

HAWAIIAN QUILTING

SUPPLY LIST

CRAFTWRIGHT
QUILTS

- **Two Contrasting Fabrics (22 in X 22 inch)**
 - Hawaiian quilting is traditionally executed in two, high-contrast colors (e.g., white and green, light blue and navy blue)
- **Fabric and paper scissors**
 - *Recommended:* [Karen Kay Buckley Micro Serrated Six Inch Scissors](#)*
- **Hand sewing needle**
 - Milliners #11 is recommended, but it is more important that you use a needle you are comfortable with for a running stitch. A thinner needle, such as #10 or #11, is easier to work with and will make the stitching more comfortable. While larger needles are sometimes easier to thread, they will slow down your stitching and put more stress on your hands.
 - *Recommended:* [Jen Kingwell Milliner's Size 11 Needle](#)*
- **Thread for applique**
 - Aurifil 80 weight in a color that matches your chosen fabrics. For optimal results, using a thread that matches your top (applique) fabric is ideal.
 - *Recommended:* [Aurifil 80 weight cotton thread](#)*
- **Basting Glue**
 - The glue is used instead of pins to hold pieces while being stitched. Glue sticks or school glue are too strong for this type of project. Liquid basting glue provides the flexibility and soft hand needed for applique.
 - *Recommended:* [Sue Daley Designs Applique Glue](#)*
- **Pins (optional)**
 - We recommend using basting glue, but if your project will not be washed or do you not want to use glue, then pins are an optional alternative.
 - *Recommended:* [Taylor Seville Magic Pins Applique Extra Fine](#)*
 -
